

Flush Valves

Flush valve for 3/4" top spud flushing urinal-maximum 13" height (c/l of inlet to top of urinal)

Model No: 81T231

COMPLIES WITH:

- IAPMO listed to CSA B125.3/ ASSE 1037.
- ADA compliant to meet Handicapped Accessibility Standard ICC/ANSI A117.1 of less than 5 lbs operating force
- (Contact Delta Representative for State and/or Local Approvals)

NOTES:

To convert 81T231 Flush Valves to Electronic, see 81T231-20BT (battery operated) or 81T231-20HW (hard wire)

For complete listing of Electronic Flush Valve models, see Electronic Flush Valves & Retrofit Kits

SPECIFICATION:

- Quiet action, Teck® exposed diaphragm flush valve
- Polished chrome plated finish
- Vandal resistant cover screw
- Metal "non hold open" ADA Compliant oscillating handle
- Vacuum breaker
- Renewable seat
- Chloramine resistant diaphragm attached to guide with forged metal retainer.
- Spud flange and concealed spud nut
- For flushing urinals with 3/4" top spud
- Maximum 330mm (13") from centerline of valve inlet to top of urinal
- 1" FIP/3/4" Copper sweat inlet adaptor for angle check stop with protecting cap
- Adjustable 121mm (4.75") plus or minus 11mm (7/16") inlet/valve outlet centers
- Cover tube and S/S wall flange
- External water conserving flush adjustment: 1.9 Litre (0.5 GAL.) Factory Set Flush at 60 psi - FIELD ADJUSTABLE from 0.47 to 3.78 Litre Flush (1/8 to 1.0 GAL.)

OPERATION:

- Adjustable flush volume using adjustment screw on flush valve

Teck® flushometer valves are designed to operate at any supply pressure between 10 psi and 125 psi in accordance with CSA B125. The Teck® flush valve delivers the industry's highest peak flows to enhance bowl scrubbing. At high water pressures, splash out, noise or reduced life of plumbing components may be observed with a few models of water closet or urinal fixtures. To minimize or eliminate these effects, select a different model of water closet or urinal from the same or another manufacturer, or install a pressure reducing valve. If the installation does not allow for either of these options, the control stop adjusting screw may be used to reduce pressure to the valve.
