Versatile use

Remodeler IC (or non IC)
► Closed ceiling
► Retrofit existing applications or new construction
► Without or with insulation

Ease of installation

Screw-in Mounting Systems 4"
Self-positioning screw in system allows for secure installation in ceilings up to 1 ¼" (32 mm) in thickness.

Screws do not come out through the back, therefore fits in more restricted areas.

Mounting Clips System 3"
Allows for a swift, simple and steady installation.

Wide Flange
The flange completely covers the opening on the ceiling and hides uneven cuts that might have enlarged the required opening.

Trim Fitting Plates
STANDARD's trim feature fitting plates with slanted corners that allow for very smooth and secure fitting.

Simplified connections

Residential electric cable clamps
The clamp behind the knock-outs secures the residential cable safely in place which means there is no need for a grommet.

Push in Connectors
Which allow for easy and rapid connection of the fixture to the main power supply.

LED RECESSED FIXTURE
For non-insulated and insulated ceiling

► Galvanized steel housing
► Trim with a unique design for smooth and secure fitting
► High quality LED lamp – stable light output and long life
► Connectors, cable clamps
► Cutting template

Remodeler Kit

Lamp colour matches the trim colour
