Product Showcase — Secure Plus

The Secure Plus deadbolt is an easy-to-use smart lock solution for multi-family projects, meticulously designed featuring the highest level of security available. With your smartphone, lock and unlock your door and securely control access to every unit door in the building. Use the Lockly® app to send one-time codes or eKeys through the administrator master account, for total security that's simple to manage and easy to audit. Unlike other static keypads where the numbers are always the same, patented PIN Genie® Technology ensures that the digital keypad display is unique every time someone approaches your door.

Building Smart - Control made easy

- **Control From Anywhere**
Lock and unlock your door wherever you are with your smartphone.
- **Real-Time Alerts & Logs**
Get notified whenever someone opens or unlocks your door.
- **Digital Key Distribution**
Simple for owners to open and control access to every unit door in the building.
- **Offline Access Code™**
Share your offline or one-time access code with your guests.
- **Fingerprint Profiles**
No need for Key FOBs, let your fingerprint do the work as a quick and easy opening of the unit entry.
- **Manual Override**
A physical key can override the system and unlock your door if necessary.

Your Finger is Your Key

State-of-the-art 3D physical fingerprint scanner reads lightning-fast and prevents the use of lifted prints.

Mobile App Control

Lock or unlock your door and create or remove access codes securely through the easy-to-use mobile application.

Perfect for Property Managers

Send one-time codes or eKeys through the administrator master account for total security that's simple to manage and easy to audit.

Lifetime Technical Support

Lockly® offers a Limited 5-Year Mechanical & Finish Warranty and 2-Year Electronics Warranty with Lifetime Technical Support.

Auto-Lock/Unlock

Set timers in advance to have your door lock automatically when you need it to.

Long-Lasting Battery Life

Standard AA batteries operate the smart lock for at least one year and are supported by a battery backup and low battery alerts.

Security Safe-Mode

Keypad-access control disables after multiple failed attempts, up to 1 hour.

At-Home Privacy Mode

Enables a do-not-disturb feature to disable keypad access. Only authorized users can gain access.
